Matthew.mortellaro@bsl-lausanne.ch

Co-author of *Selling Blue Elephants: How to Make Great Products that People Want Before They Even Know They Want Them*, Gofman will present Rule Developing Experimentation (RDE) which is the basis for MindGenomics and explains how mindsets may be categorized. Published by Wharton School Publishing, the book was named among the 30 best business books of 2007 by Soundview Executive Book Summaries.

“I am pleased for the opportunity to introduce business students and executives to an entirely new way of approaching consumer research and marketing,” said Gofman. “By implementing MindGenomics, tomorrow’s business leaders will be better equipped to gauge consumer need and ensure long-term growth.”

Gofman is Vice President of Moskowitz Jacobs Inc, a leading consultancy for marketing intelligence, and is an Adjunct Associate Professor at Pace University. Partnering with experimental psychologist Dr. Howard R. Moskowitz, Gofman released *Selling Blue Elephants* in July 2007 in order to provide business innovators with MindGenomic’s RDE process for better understanding their clients and consumers. By combining psychology and information technology, MindGenomics enables companies and entrepreneurs to assess consumer needs and desires for potential products and services through experimentation.

BSL hosts this event, including a networking snack, as its commitment to the Lausanne business community. The event is open to members of the business community who wish to discover BSL and the new science of MindGenomics. Space is limited. All attending will be offered a complimentary copy of the book *Selling Blue Elephants*.

About Business School Lausanne
