Anna Krocza

Giovanni Facchinetti

Stephan Egloff

Overview

- 1. The Economy for the common good (ECG)**
- 2. The ECG Matrix (or balance sheet)**
- 3. A stakeholder engagement process**
- 4. Implementation of projects around blind spots**

THE ECONOMY FOR THE COMMON GOOD

WHAT DOES IT MEAN AND
WHAT DOES IT MEAN FOR
A BUSINESS SCHOOL
AND FOR BSL IN PARTICULAR?

What means Economy for the Common Good?

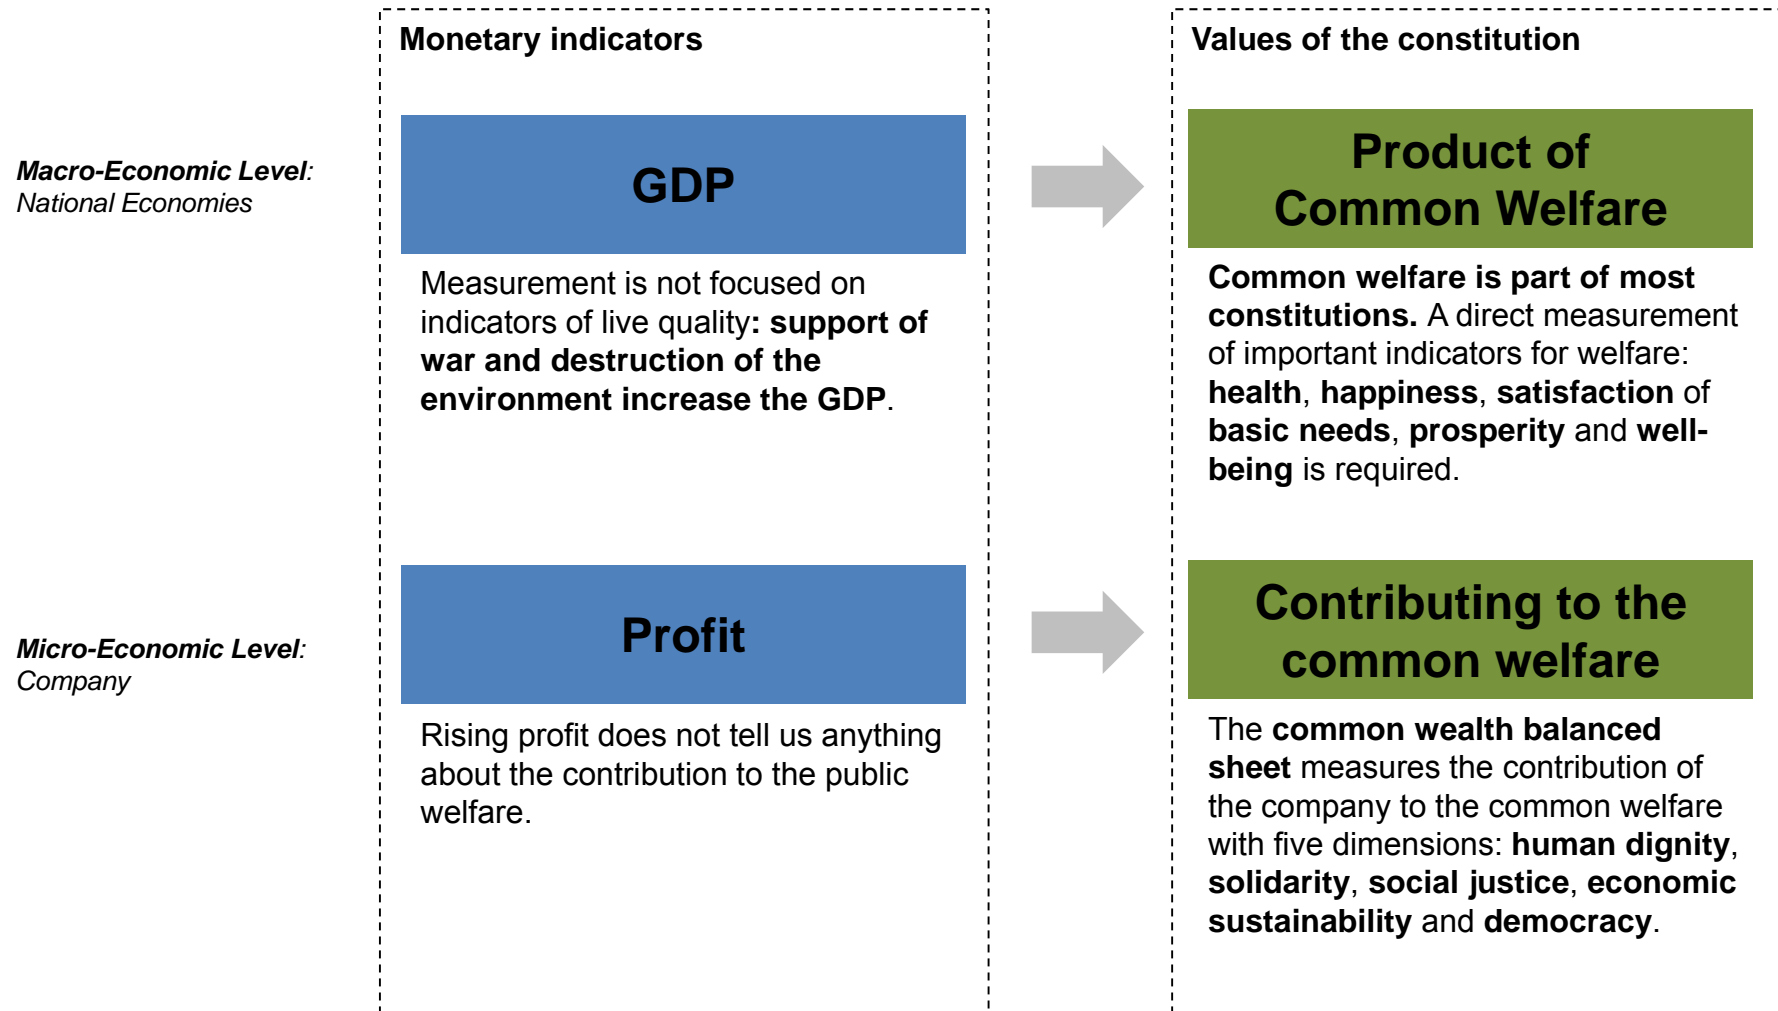

The common good is the greatest possible good for the greatest possible number of individuals.

- The Common Good Economy is an **economic alternative** to the free market economy and the centrally planned economy.
- In contrast to the others it places the **human being** and all living entities as well as **fulfilling interpersonal relationships at the centre** of economic activity.

How does it work?

From profit-orientation and competition to the pursuit of the common good and cooperation. It starts with the fundamental question of how we **measure economic success**.

Business, as strongest force in society, should support our constitutional principles and values

business is an intrinsic part of society

Values of the constitution

Product of Common Welfare

Common welfare is part of most constitutions. A direct measurement of important indicators for welfare: **health, happiness, satisfaction of basic needs, prosperity and well-being** is required.

Contributing to the common welfare

The **common wealth balanced sheet** measures the contribution of the company to the common welfare with five dimensions: **human dignity, solidarity, social justice, economic sustainability and democracy.**

Measuring the companies contribution to the common welfare with the Common Good Matrix

Score

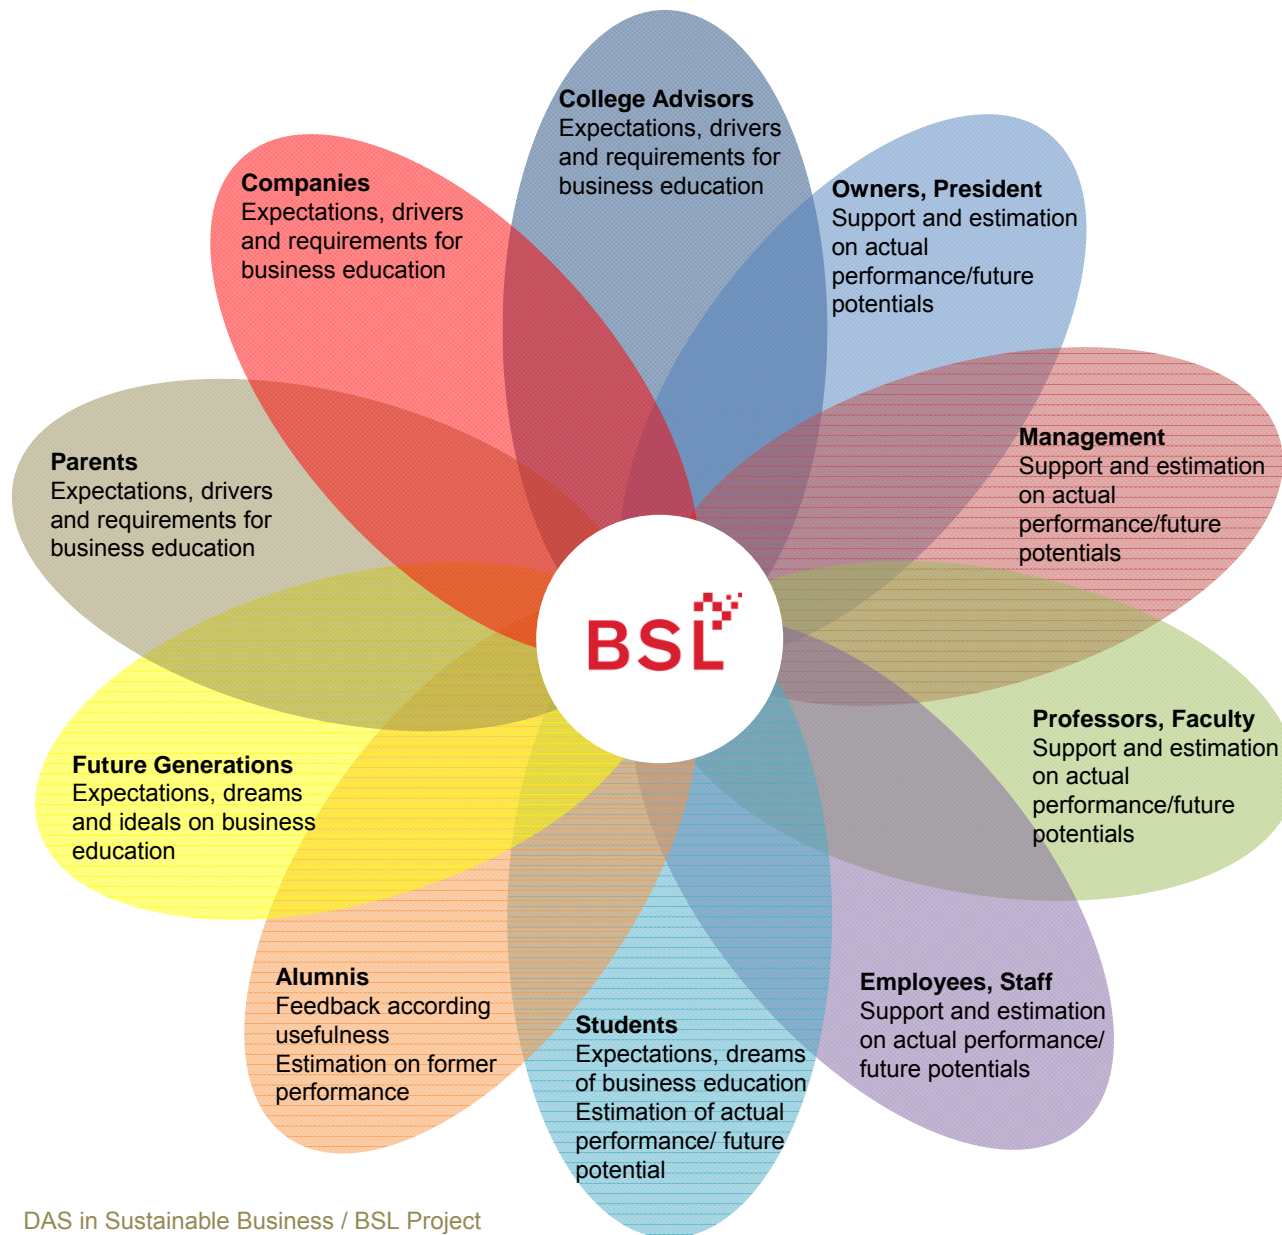

<div> <div> COMMON GOOD MATRIX 4.0 <small>Version: 30 July 2012. This version is valid for Common Good Balance Sheets generated in 2012.</small> </div> <div> ECONOMY FOR THE COMMON GOOD <small>New Values for our Economy</small> </div> </div>					
STAKEHOLDER	Human dignity	Solidarity	Ecological Sustainability	Social Justice	Democratic Co-determination & Transparency
A) Suppliers	A1: Ethical Supply Management Thinking about risks of products / services, considering social and ecological aspects of suppliers and service partners				90
B) Investors	B1: Ethical Financial Management Considering social and ecological aspects when choosing financial services, common good oriented investments and fundings				30
C) Staff Incl. Owners	C1: Job quality an Equality Guaranteeing humane work conditions , advancing physical health and mental well-being, self-organized and meaningful working environment, Life Balance, equal opportunities / inclusion of disadvantaged persons 90	C2: Just distribution of labor Reduction of overtime working hours, waiving all-inclusive contracts, reduction of standardized working hours, contribution to the reduction of unemployment. 50	C3: Advancing and demanding eco-friendly behavior and a sustainable lifestyle of staff members (mobility, food), training and awareness raising activities, sustainable organizational culture 30	C4: Just distribution of incomes, low wage dispersion (netto) within a company, compliance with minimum and maximum incomes 60	C5: Transparency and co-determination Transparency of decisions and figures, co-determination of staff members on operative strategic decisions, election of executive managers, transferring ownership to staff members (e.g. sociocracy) 90
D) Customers / Products / Services / Business Partners	D1: Ethic sales Customer focus and co-determination, cooperation with consumer associations, trainings in ethic sales, ethical marketing, ethically adjusted bonus schemes 50	D2: Solidarity with business partners Dissemination of information, know-how, personnel, orders; interest-free loans, participation in cooperative marketing and crisis management 70	D3: Ecological design of products and services Offering of ecologically superior products/services; awareness raising programmes, consideration of ecological aspects when choosing customer target groups 90	D4: Social design of products/ services Social grading of prices, no barriers, special products for disadvantaged customers 30	D5: Raising social and ecological standards within the specific sector, role model effect, development of higher standards together with business partners, lobbying 30
E) Social Environment: Region, sovereign, future generation, global fellow human beings, animals and plants	E1: Social effect and Impact of products / services Meaningful products under consideration of sustainable lifestyles 90	E2: Contribution to the local community Mutual support and cooperation through financial resources, services, products, logistics, time, know-how, knowledge, contacts, influence 40	E3: Reduction of impact on the environment Reduction of business-specific environmental impact on a sustainable level: resources, energy & climate, emissions, waste etc. 70	E4: Minimizing distribution of profits to external persons No interest-rates or at most inflationary adjustment of the capital of external owners 70	E5: Social transparency and co-determination, reporting in accordance with Global Reporting Initiative (GRI), Common Welfare Report, co-determination of
Negative Criteria	Violation of ILO-norms and standards / human rights -200 Products not respecting human dignity, e.g. weapons, nuclear power, genetically modified food -200 Acquisition at / Cooperation with companies that violate human dignity -150	Hostile takeover -200 Blocking-off patents -100 Dumping prices -200	Massive environmental pollution -200 Gross violation of environmental standards (e.g. limiting values) -150 Planned obsolescence (short lifespan) -100	Unequal wage distribution Job creation Subsidies Interest > 10 %	

Framework to measure the score of the company in the constitutional dimensions:

- **human dignity**
- **solidarity**
- **social justice**
- **ecological sustainability**
- **democracy**

A) Integration of relevant Stakeholders

Presentation at BSL

October 19 / 20

- The President, Associate Dean, Dean
- Staff and some Professors

June 14, 2013

BSL Project – The Economy for the Common Good

Factsheet

C5: Transparency and co-determination

Transparency of decisions and figures, co-determination of staff members on operative strategic decisions, election of executive managers, transferring ownership to staff members (e.g. sociocracy)

Item	First steps	Advanced	Experienced	Role Model
Degree of transparency 10%	First steps to more transparency	Some critical data are transparent	Essential critical data are transparent	All data are transparent accessible for all employees
Legitimacy of Leadership 20%	Hiring management: Consultation of employees	Hiring management: Veto right for employees (test phase: 25% elected)	Hiring management: Veto right for employees (test phase: 75% elected)	Hiring management: Veto right for employees (test phase: 100% elected)
Participation on fundamental decisions (Employees and students) 30%	Consultation and reasons, Concept of democratic participation existent	Test phase -25% of decisions are democratic, partially consensual	25-75% of decisions are democratic, a minimum of 25% consensual	75-100% democratic decisions, a minimum of 50% consensual
Participation on distribution of profits 10%	Concept of profit-sharing existent, test phase	25% of profits are distributed consensual	25-75% of profits are distributed consensual	Complete profit is distributed consensual
Ownership 20%	1-24% owned by employees	Blocking minority owned by employees (>25%)	Majority owned by employees (>50%)	Firm owned by employees (e.g. foundation)

Basic Matrix 4.0

[Aspects for Business School](#)

* Initiative for minimum salary CHF 4000

Questions

Degree of transparency

- Are processes and data transparent and available for employees?

Legitimacy of Leadership

- Will employees be involved in case of hiring a new management position?
- Do employees have a veto right?
- Is there a test phase for management positions?
- What percentage of the tested management positions are elected, voted for?

Participation on fundamental decisions

- To what amount employees can participate in decision-making?
- Are employees organised in council?
- Will employees be consulted before decision?
- What percentage of the decisions is made democratic?
- What percentage of the decisions is made consensual?

Participation on distribution of profits

- Is there a concept for the distribution of profits to the employees?
- What percentage of the profit will be distributed consensual?

Ownership

- What percentage of the company do the employees own?
- Do employees have a blocking minority?
- Does an employee foundation exist?

DAS in Sustainable Business, Business School Lausanne and HSG

C) We adapted the matrix to the specific circumstances of a business school.

Some Business School specific items are suggested, but these items have to be verified by the Common Goods Economy.

BSL Project – The Economy for the Common Good

A1: Ethical Supply Management

Thinking about risks of products / services, considering social and ecological aspects of suppliers and service partners

Item	First steps	Advanced	Experienced	Role Model
Regional, ecological and social sourcing 40%	Punctually, risk products (energy)	Most important p/s	Most important p/s Reduction of critical p/s	All important p/s Innovative solutions to prevent critical p/s
Processes and risk management for p/s 20%	Internal dialogue, research, integration in contracts (code of conduct)	Internal audit for important suppliers Training and workshops for purchasing	Continuous risk evaluation Independent audit (certification, seal of quality, NGO)	Cooperation with suppliers and partners for social and ecological aspects
Structural framework for fair prices 20%	Abstinance of price-driven purchasing No price-driven incentive system	Long-term partnerships	Evaluation of employee behaviour in qualification discussion	Innovative structures (e.g. alternative money systems)
Considering sources of sustainable theory and practice (supply for content of teaching) 20%	Research on sustainable topics Internal exchange	Continuing education of professors in the field of sustainability	Network with other international institution in the field of sustainability theory	Cooperation with businesses and other schools in the field of sustainability practices

Basic Matrix 4.0

Additional Aspects for Business School

June 14, 2013

D) 250 questions were split to different stakeholder groups, online questionnaires will be conducted next week

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	R
	1. Owner	2. President	3. Management	4. Staff	5. Professors	6. Advisory Board	7. Students	8. Alumni	9. Future Generations	10. Parents	11. Companies	12. College Advisors	STHGRP	TOPIC	TOPIC (TXT)	QUESTIONS	
208														3	Ecological Sustainability	Do you have ISO 14001 or ISO 26000 certifications?	
209														3	Ecological Sustainability	Do you have any other independent certification?	
210														3	Ecological Sustainability	Do you publish a sustainability report?	
211														3	Ecological Sustainability	What do you measure in terms of sustainability (paper usage, energy usage, CO2 emissions, mobility statistics, recycling, etc.)?	
212														3	Ecological Sustainability	How do you heat, resp. cool its premises (fossil fuels heating system, electric A/C in summer)?	
213														3	Ecological Sustainability	Do you have a system to monitor and improve its footprint?	
214														4	Social Justice	What percentage of the profit is distributed to external owners?	
215														4	Social Justice	How do you improve social injustice / imbalances?	
216														4	Social Justice	How does it measure efforts?	
217														4	Social Justice	Do you address the topic of social injustice and unequal capital distribution?	
218														4	Social Justice	Do you teach money as means to deliver meaning, not as end?	
219														4	Social Justice	Do you cooperate in research and practice to find and proof alternative systems?	
220														4	Social Justice	Do you teach the theory of shareholder value?	
221														4	Social Justice	Do you teach alternative theories?	
222														5	Democratic co-determination	In what areas / for what aspects is your university transparent?	
223														5	Democratic co-determination	To whom you provide transparent information?	
224														5	Democratic co-determination	Where do you provide transparent information?	
225														5	Democratic co-determination	Do you have several locations?	
226														5	Democratic co-determination	If yes, do you provide your information on all locations?	
227														5	Democratic co-determination	Do you report on all Economy of Common Goods indicators?	
228														5	Democratic co-determination	Do you deliver detailed description in your report?	
229														5	Democratic co-determination	Do you report on every criteria within an indicator?	
230														5	Democratic co-determination	Is your co-determination (being involved in decision making processes) passive, active or proactive?	
231														5	Democratic co-determination	How do you document these participatory decisions?	
232														5	Democratic co-determination	Do you share this documentation?	
233														5	Democratic co-determination	What kind of decisions do you co-determine?	
234														5	Democratic co-determination	How often do you do that?	
235														5	Democratic co-determination	Do you include strategically decisions in this co-determination?	
236														5	Democratic co-determination	How many stakeholders do you include in the co-determination?	
237														1	Human dignity	Do you in any kind violate ILO-norms or standards of human rights?	
238														1	Human dignity	Do your products in any way not respect human dignity (e.g. weapons, nuclear power, genetically modified food)?	
239														1	Human dignity	Does your procurement or other cooperative activities with other companies/ universities of yours violate human dignity?	
240														2	Solidarity	In your classes and curriculum do you consider different perspectives on hostile takeovers and economic destructive competition?	
241														2	Solidarity	Do you include discussions about block-off patents (unnecessary patents in order to prevent potential competitors to enter their market)?	
242														2	Solidarity	Do you consider dumping pricing in your classes, discuss negative aspects of it?	
243														3	Ecological Sustainability	Are you accountable for any massive environmental pollution?	
244														3	Ecological Sustainability	Are you accountable for gross violation of environmental standards (e.g. limiting values)?	
245														3	Ecological Sustainability	Do your products and services have a planned obsolescence (short lifespan)?	
246														4	Social Justice	Do you apply unequal remuneration for women and men?	
247														4	Social Justice	Do you cut jobs or do you do off-shoring for profits?	
248														4	Social Justice	Do you have subsidiaries in tax havens?	
249														4	Social Justice	Do you provide interest rates on equities > 10 %?	
250														5	Democratic co-determination	Do you have non-disclosure of shareholdings and subsidiaries?	
251														5	Democratic co-determination	Is a works council prohibited?	
252

E) A structured document was set up to track the learnings while the document for the Action Research Report

WEEK	HIGHLIGHTS	LEARNINGS	ACTIONS
38 17-23	DAS start @ HUB, First exposure to Project and Common Goods Economy (CGE)	Keen interest by BSL* Dean to implement CGM as measurement tool, Zero to little awareness of CGE @ BSL, CGE is a new movement & still little known. We got new info about BSL, its owners, its values, its goals.	we started searching online and reading material on CGE and CGM as well as on BSL
39 24-30	1st team teleconference, exposure to CGE, contacted C. Felber, more reading and researching.	Definition of the scope of the project, rather complex and not clear-cut, very easy to wander off track. We gathered more info about CGE and CGM online.	lots of reading and thinking about the CGE theory and how to implement it
40 1-7	2nd team teleconference, we contacted some institutions who as indicated by C. Felber were implementing the CGM, Team presentation sent to Dean	No academic institution has apparently implemented the CGM, we have the feeling that they are waiting for us to start and give them the finished tool, adapting the CGM,	preparation of questions for BSL in relation to the implementation of the CGM asse: adapt the matrix to BSL/academic institution.
41 8-14	3rd team teleconf, feedback from Dean with comments on timetable, request for budget	we need to adapt timetable to respect milestones & deliver on time,	further discussion on clarification of what is important for implementing the CGM @
42 15-21	4th team teleconf, Team @ BSL, presentation of project to faculty & staff, meeting with S. Notter (energy field Luzern), team discussion on situation & action plan	lukewarm reception of BSL-CGM project by faculty & staff, OK to prepare questionnaires, more planning & time mgmt needed from group. Strong buy-in from key stakeholders needed. We need to find a champion of the CGM INSIDE BSL, who can support us and continue the work once the project is over.	budget redefined, team discussions on next steps
43 22-28	5th team teleconf, planned group meeting on 11.11 in ZRH, Action research report work started, started working on a factsheet for each of the 17 fields,	there is a fundamental question to address: can the matrix be adapted at all (to accomodate the particular needs/characteristics of an academic institution) or not (as an adaptation could distort the original goals and not be validated by the CGE movements)	Budget proposal sent to Dean, some work split & assigned to individuals, Guenther to be asked about feasibility of adaptation of CGM.

Agenda

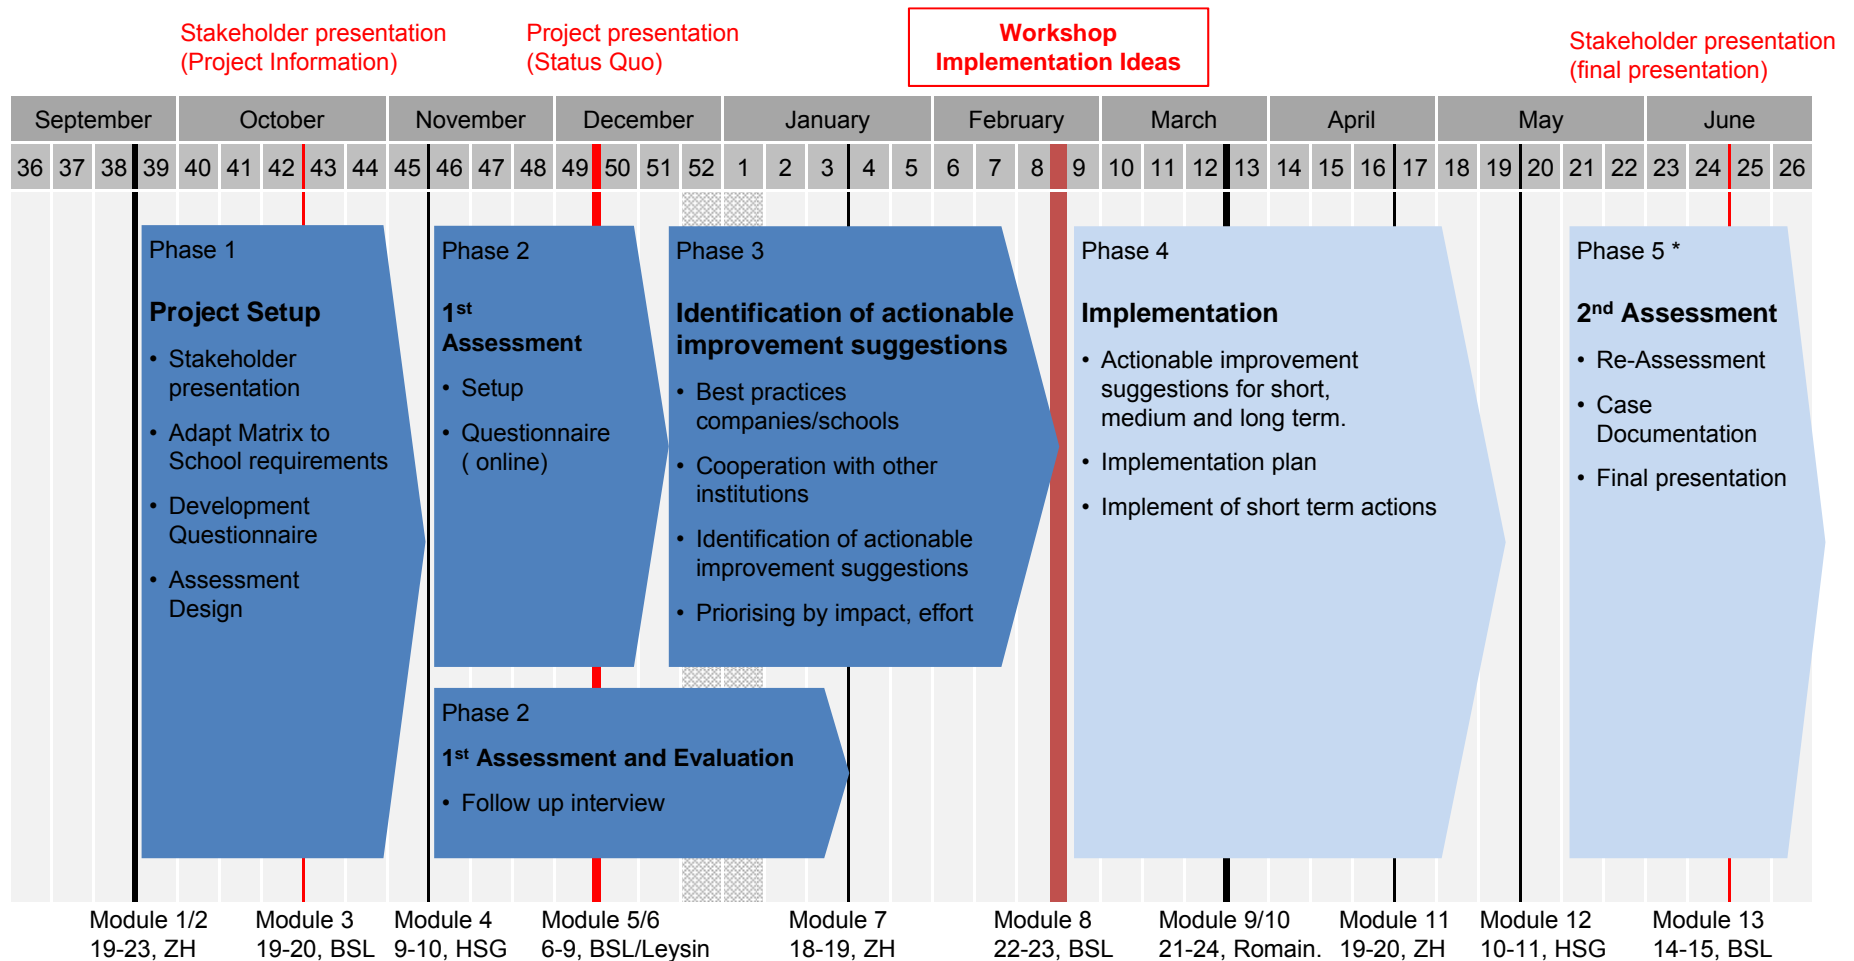

1. Common Goods Matrix
2. Project plan and intermediate results
- 3. Questions and unexpected challenges**
4. Outlook and issues to discuss

Overall Goal of the Project

The Business School Lausanne wants to use the Common Good Matrix (CGM) **to identify sustainability potential and to initiate internal change.**

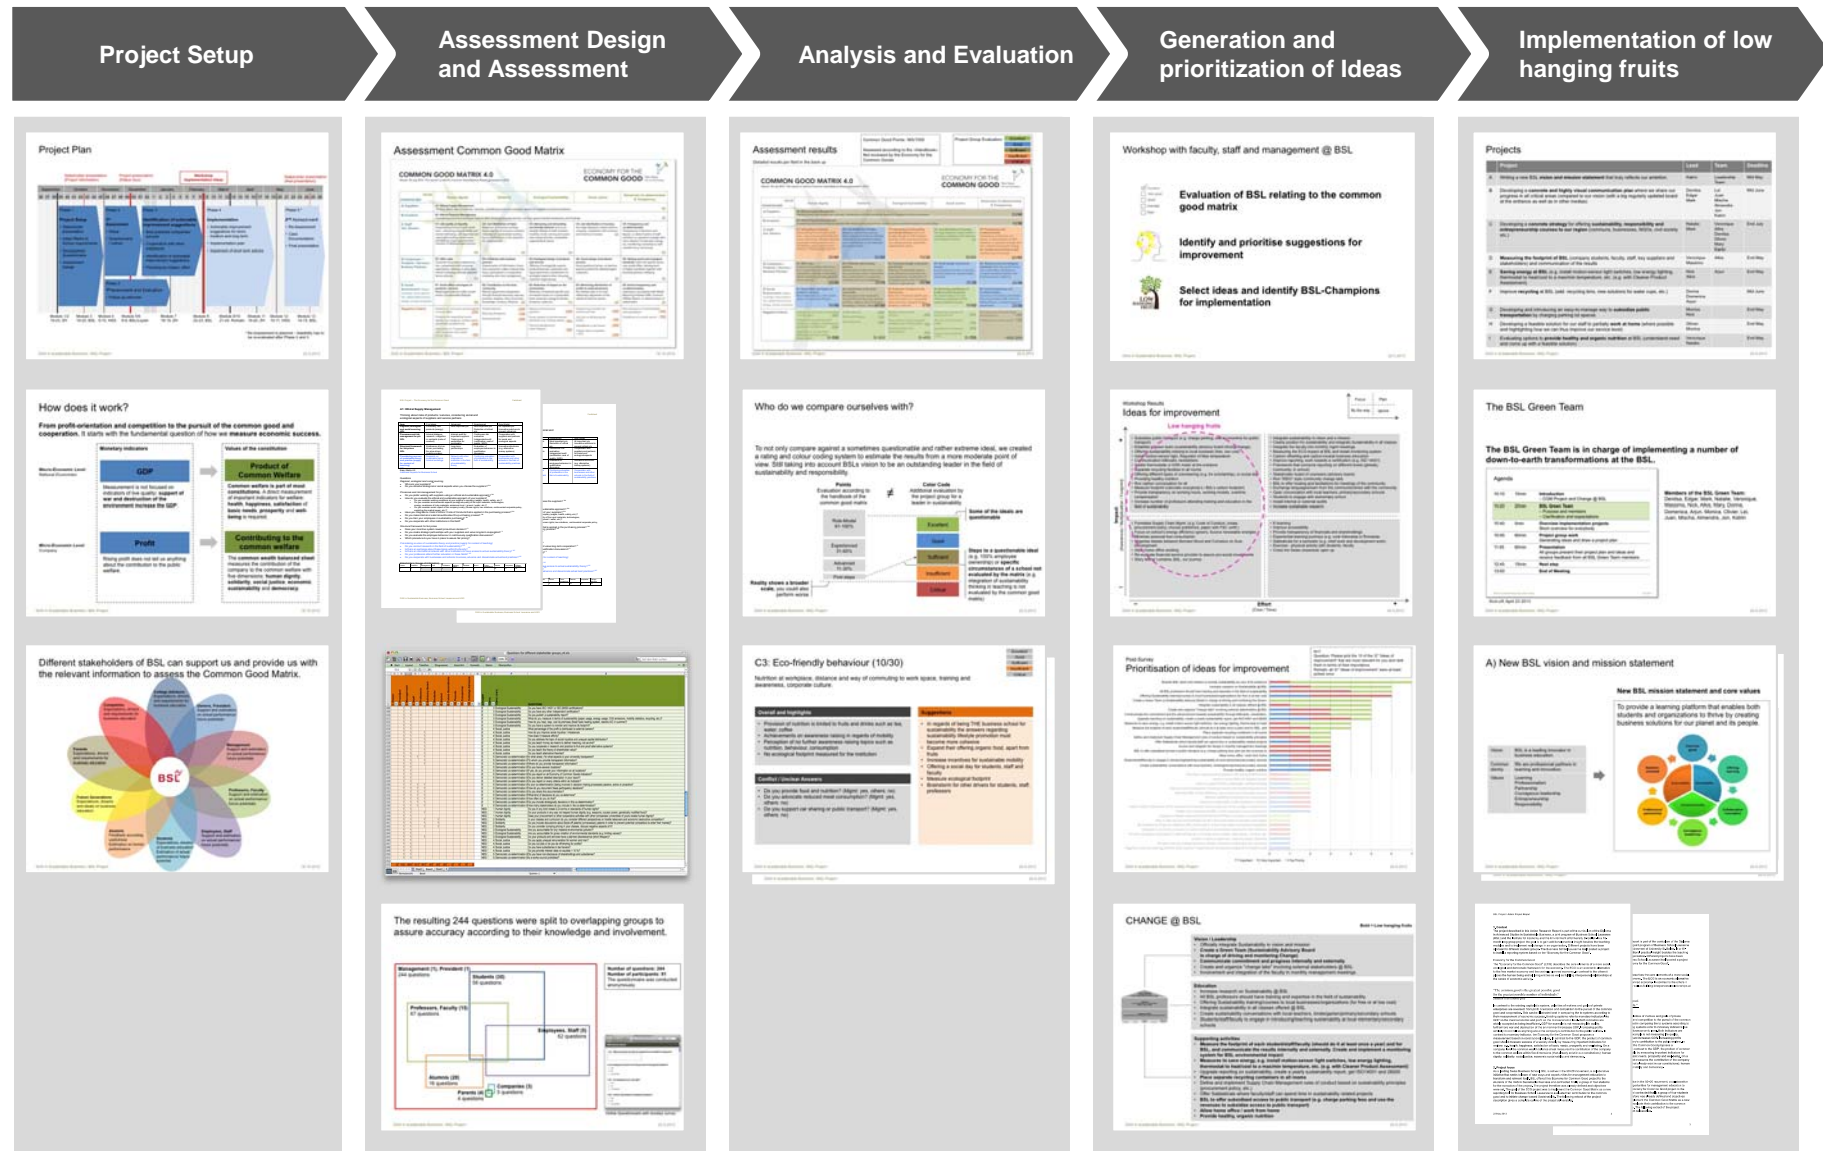

Project Plan

* Re-Assessment is planned – feasibility has to be re-evaluated after Phase 2 and 3

Project overview

THE ECG MATRIX

(OR BALANCE SHEET)

SO WHERE DO WE STAND
AND WHERE ARE OUR
BLINDSPOTS?

Overall Goal of the Project

Instrument to initiate change

The Business School Lausanne wants to implement the **Common Good Matrix (CGM) as assessment and reporting tool** complementing the existing financial reporting and balanced score-card.

Measuring the Contribution to the Common Good with the Common Good Matrix

Framework to measure the score of the company in the constitutional dimensions:

- **human dignity**
- **solidarity**
- **social justice**
- **ecological sustainability**
- **democracy**

Aimpoints for Business School

* Initiative for minimum salary CHF 4000

Questions

Degree of transparency

- Are processes and data transparent and available for employees?

Legitimacy of Leadership

- Will employees be heard in case of hiring a new management position?
- Do employees have a veto right?
- Is there a test phase for management positions?
- What percentage of the tested management positions are elected, voted for?

Participation on fundamental decisions

- To what amount employees can participate in decision-making?
- Are employees organised in council?
- Will employees be consulted before decision?
- What percentage of the decisions is made democratic?
- What percentage of the decisions is made consensual?

Participation on distribution of profits

- Is there a concept for the distribution of profits to the employees?
- What percentage of the profit will be distributed consensual?

Ownership

- What percentage of the company do the employees own?
- Do employees have a blocking minority?
- Does an employee foundation exist?

DAS in Sustainable Business, Business School | Lausanne and HSG

The resulting 244 questions were split to overlapping groups to assure accuracy according to their knowledge and involvement.

Number of questions: 244
Number of participants: 91
The questionnaire was conducted anonymously

Online Questionnaire with monkey survey

Suppliers

[illegible]

Overall

- Suppliers are chosen by **the consideration of environmental and social aspects** and **no harmful incentive schemes are installed**.
- Additionally the school integrates and sources **new theories in sustainability** for their teachings (supply chain of an educational institution; not reflected in the matrix score, but integrated in the groups evaluation)

Room for improvement

- **No official approach** to identify ethical suppliers existing
- **No code of ethics** installed
- **No internal or external audit** are conducted

Overall

- Financial service provider is **considering but not specialised social and ecological aspects**
- BSL in cases **provides interest free funding** for staff and faculty, occasionally for students

Room for improvement

- No investments go to social or ecological projects**
- No certainty that investments do not harm the common good**

Stakeholder specific summary

Employee (staff, faculty)

Category	Human dignity	Sustainability	Ecological Sustainability	Social Justice	Economic Sustainability & Transparency
11 Staff and Students	30/90	30/90	10/90	50/90	20/90
12 Products & Services	20/90	30/90	30/90	25/90	25/90
13 Social Relationships	30/90	30/90	30/90	50/90	20/90
14 Regional Context	10/90	0/90	0/90	0/90	100/250

Overall

- General **work environment is perceived to be well**, working hours are recorded
- **Different working models** available (incl. part-time)
- Role-modelling max. **proportion between highest and lowest salary (1:3)**
- Strictly fulfilment of **living wages**
- **Hiring of additional staff** due to reduction of working hours and over-time

Room for improvement

- **Lack of awareness** regarding sustainability and sustainable lifestyle
- **No ecological footprint measured**
- Little incentives for **stainable mobility**
- **Lack of transparency** on existing working models (incl. home office) and regarding salary structures
- No model for **handling overtime** of faculty
- Little offering of **organic food and nutrition**
- No facilities offered to do **sports, to recreate or to relax**
- No **health prevention and sensitisation activities**
- No **barrier free access for handicapped**
- No support for **mothers or disabled people**
- **Legitimacy of leadership** appears to be in the hands of senior management
- **Democratic decision making** and involvement of stakeholders are only partially installed
- **Advisory board needs to be integrated**

Stakeholder specific summary

Product

Stakeholder	Human Dignity	Wellbeing	Ecological Sustainability	Social Justice	Economic Sustainability & Transparency
A: Suppliers	20/90	20/90	20/90	20/90	20/90
B: Investors	20/90	20/90	20/90	20/90	20/90
C: Staff	20/90	20/90	20/90	20/90	20/90
D: Customers / Teachers / Business Partners	20/90	20/90	20/90	20/90	20/90
E: Government / Regulators	20/90	20/90	20/90	20/90	20/90
F: Society	20/90	20/90	20/90	20/90	20/90

I: All Stakeholders	20/90	20/90	20/90	20/90	20/90

Overall

- **BSL cooperates with academic institutions worldwide** with the purpose of promoting & raising social and ecological standards
- **Ethical values are in place**
- **Sustainability courses** are offered as part of the curriculum
- **Scholarships** are offered to selected groups of students

Room for improvement

- **Sustainable behaviour is not formalised and formulated in vision, mission and guidelines**
- **Lack of clarity among stakeholders** on what BSL corporate culture is and stands for
- **Lack of transparency, co-decision making and co-determination** of curriculum processes
- **No e-learning solutions provided**
- **Little promotion of a sustainable lifestyle** through incentives and price-advantages (ex. use of public transport, economic organic food, parking for hybrid & electric cars only)
- **Narrow access with scholarships**
- **Hard access for people with physical disabilities**
- **BSL is not yet clearly and fully positioned** as the school for "sustainability"

Stakeholder specific summary

Environment

Stakeholder	Human dignity	Society	Ecological Sustainability	Social Justice	Economic Sustainability & Transparency
4. Suppliers	30/90	30/90	30/90	30/90	30/90
5. Investors	30/90	30/90	30/90	30/90	30/90
6. Staff	30/90	30/90	30/90	30/90	30/90
7. Customers / Providers / Partners	30/90	30/90	30/90	30/90	30/90
8. Local community	30/90	30/90	30/90	30/90	30/90
9. Society	30/90	30/90	30/90	30/90	30/90
10. Global community	30/90	30/90	30/90	30/90	30/90
11. Future generations	30/90	30/90	30/90	30/90	30/90
12. Planet	30/90	30/90	30/90	30/90	30/90
13. Overall	30/90	30/90	30/90	30/90	30/90

Overall

- Education has a **positive impact** on society and a contribution to the common good **per se**
- **Family owned business** with no external distribution of profit
- **Information is transparently provided** to all who show interest, apart from financial information
- **Co-determination of stakeholders** is supported and proactively engaged
- Strong efforts around **50+20 initiative** (global community impact)

Room for improvement

- **Very little engagement / contribution to the local community**
- **No measurement** of their contribution to the community
- Disparity in answers reflects **insufficient internal communication**
- Survey shows **uncertainty of impact** and approach of BSL services on enhancing a sustainable lifestyle within different stakeholder groups

Stakeholder specific summary

Negative Criterias

Insufficient
Critical

A1: Ethical Supply Management (20/90)

Thinking about risks of products / services, considering social and ecological aspects of suppliers and service partners

Overall and highlights

- Considering ecological and social aspects
- No price-driven incentive system
- Continuous employee evaluation in qualification discussions
- Sourcing of sustainability theories for teaching
- Research is only conducted through doctoral programs
- Some, but not all Professors attend further education in the field of sustainability.

Conflict / Unclear Answers

- Do you consider environmental aspects (ecological quality of the input materials, technologies, energy, avoidance of risky materials, emissions to air / ground / water, etc.)?
(Pres: yes, Mgmt: no)
- Do Professors attend further education in the field of sustainability (Mgmt: yes, Prof: 60%no)

Suggestions

- Develop an approach to identify ethical suppliers
- Implement a Code of Ethics additional to the BSL values e.g. working conditions of suppliers and partners
- Train employees and cooperate with other institutions in ethical and social supply chain management.
- Install internal and external audits (on ethical supply chain management, or broader audit approach such as GRI or selective ISO standards)
- Encourage Professors to do sustainability related research
- Increase number of Professors attending training and education in the field of sustainability
- Source renewable energies

Excellent
Good
Sufficient
Insufficient
Critical

B1: Ethical Financial Management (10/30)

Rewarding three different aspects of financial management: common goods orientation, social and ecological quality of financial services

Overall and highlights

- Financial service provider is considering but not specialised social and ecological aspects
- No investments going to social or ecological projects – though not applicable
- No certainty, that investment is not harmful to the common good
- Providing and receiving interest free funding (for staff and faculty, occasionally for students)

Conflict / Unclear Answers

- Some questions seemed unclear to the survey participants

Suggestions

- Clarification of contradicting answers necessary
- Re-evaluate financial service provider and assure pro-social investments

Excellent
Good
Sufficient
Insufficient
Critical

C1: Job quality and equality (30/90)

Considering working conditions: physiological and psychological health, employee satisfaction, self-determination, personal development, work-life balance, meaning

Overall and highlights

- Ergonomic aspects are perceived OK
- Educational events, workshops for teambuilding and conflict Mgmt as well as for personal development are recognized
- No health prevention and awareness-raising activities
- No barrier free access for handicapped
- No facilities offered for sports, recreation or relaxation
- No support for mothers or disabled people

Conflict / Unclear Answers

- Differing perception of work conditions regarding: flexibility / part-time / overtime / compensation (Mgmt / Pres vs. staff/faculty)
- the same applies for: facilities to cook / gender information / workshop on social competence / employer satisfaction questionnaire / development of vision / publishing an equality report / measures to promote women

Suggestions

- Provide more transparency on working hours design (flexibility/for whom/how)
- Provide more opportunities for parents to design their work
- In regards of nutrition BSL could expand their offering organic food, apart from fruits: e.g. snack machine or other offering could contain more organic food
- Brainstorm sessions about how to improve the working environment and learning spaces
- Provide transparency on gender & diversity information, install gender-responsible
- Establish accessibility and support for disadvantaged persons (incl. communication on website)

Excellent
Good
Sufficient
Insufficient
Critical

C2: Just distribution of labour (30/50)

Fair balance and distribution of labour, diminishing unemployment, increase productivity.

Overall and highlights

- Working hours are recorded
- Different working models available (part-time, work from home, etc.) but no transparency on the existing models
- Hiring additional staff to reduce working hours and over-time
- Working part-time is possible

Conflict / Unclear Answers

- In comparison to responses from staff and professors the answers differ in regards of available working models and overtime handling (contradicting answers in field C1)

Suggestions

- Provide transparency on existing working models for staff and faculty
- Introduce further alternative models such as flex-time, promote working from home (particularly for parents)
- Come up with a model for handling overtime of faculty
- Considering if more overtime could be tackled by hiring additional work force or other measures

Excellent
Good
Sufficient
Insufficient
Critical

C3: Eco-friendly behaviour (10/30)

Nutrition at workplace, distance and way of commuting to work space, training and awareness, corporate culture.

Overall and highlights

- Provision of nutrition is limited to fruits and drinks such as tea, water, coffee
- Achievements on awareness raising in regards of mobility
- Perception of no further awareness raising topics such as nutrition, behaviour, consumption
- No ecological footprint measured for the institution

Conflict / Unclear Answers

- Do you provide food and nutrition? (Mgmt: yes, others: no)
- Do you advocate reduced meat consumption? (Mgmt: yes, others: no)
- Do you support car sharing or public transport? (Mgmt: yes, others: no)

Suggestions

- In regards of being THE business school for sustainability the answers regarding sustainability lifestyle promotion must become more cohesive
- Expand their offering organic food, apart from fruits
- Increase incentives for sustainable mobility
- Offering a social day for students, staff and faculty
- Measure ecological footprint
- Brainstorm for other drivers for students, staff, professors

Excellent
Good
Sufficient
Insufficient
Critical

C4: Just distribution of incomes (50/60)

Considering a fair and transparent compensation scheme, minimum wages, compensation spread between highest and lowest

Overall and highlights

- Proportion between highest and lowest salary (1:3)
- No transparency on the salary
- Fulfilment of living wages

Conflict / Unclear Answers

- ./.

Suggestions

- Increase transparency of compensation structure

Excellent
Good
Sufficient
Insufficient
Critical

C5: Transparency and co-determination (20/90)

Empowerment of employees, identification with the company, employee motivation, a corporate culture based on partnership, innovative solutions

Overall and highlights

- Striking is that the advisory board had no information to the majority of questions and could not answer them
- Democratic decision making and involvement of other stakeholders are partially installed
- No veto right for employees

Conflict / Unclear Answers

- Are employees involved in the hiring process of management positions? (Mgmt: yes, Pres/faculty: no)
- Do employees have a veto right? (Mgmt: yes, Pres/faculty: no)
- Is there a test phase for management positions? (Mgmt: yes, Pres/faculty: no)
- What percentage of the tested management positions are elected, voted for? (Mgmt: yes, others: no)
- What amount of the decisions are made democratic / consensual (Pres/Mgmt: 80%, staff/faculty: 20-40%)
- What percentage of Profit will be distributed consensually? (no answer)

Suggestions

- Integrate advisory board and foster information exchange
- Legitimacy of Leadership appears to be only in the hands of senior management, here a co-decision making should be considered, communicated and executed, where possible
- Enable employees to buy stakes
- Establish employee council or foundation
- Increase transparency in multiple areas
- Consider introducing the voice of staff, faculty and students more formally in high level management decision making process

Excellent
Good
Sufficient
Insufficient
Critical

D1: Ethical sales (20/50)

Customer focus and co-determination, cooperation with students' associations, ethical marketing

Overall and highlights

- Ethical values in place
- BSL implements training in ethical values
- Alternative compensation KPI's to measure performance in place
- Sales numbers in the sense of recruited students are partly relevant (qualitative and numerical criteria considered for the bonus payments)

Conflict / Unclear Answers

- Does an advisory panel formed from different stakeholders for the co-decision making and co-determination of study curriculum exist? (both yes/no answers)
- What kind of decisions is made in this advisory panel? (differing)
- Is the decision making process transparent? (differing)
- How much of the advisory panel's suggestions are implemented? (differing)

Suggestions

- Co-decision making and co-determination of curriculum processes should become more transparent

D2: Solidarity with business partners (35/70)

Cooperative marketing, sharing relevant information & know-how, support of interest free loans

Overall and highlights

- There is some solidarity with business partners, according to BSL values
- Cooperation with other universities/ institutions is taking place
- Doing wide reaching marketing

Conflict / Unclear Answers

- ./.

Suggestions

- The solidarity (cooperative behaviour) with business partners could be stronger and the willingness of doing so communicated more assertively (for ex. formalizing rules, behaviour and provision of clarity among stakeholders on what BSL does and doesn't do and stand for (corporate culture))
- Rules and plan of communication with mass media

D3: Ecological design of products and services (45/90)

Ecological aspects of products & services offered

Overall and highlights

- Easy accessibility of work space via public transportation
- Sustainability courses are offered as part of the curriculum
- Ecological aspects and the idea of sustainability is communicated
- No e-learning solutions provided

Conflict / Unclear Answers

- Is there as strategy to reduce the time of attendance by providing digital solutions? (Adv.B.: yes, others: no)
- Is there a strategy to set up an e-learning platform for distant or blended learning? (Adv.B.: yes, others: no)
- Does the institution conduct student surveys to gain information about ecological aspects and potentials? (Adv.B & Students.: yes, others: no)

Suggestions

- Offer E-Learning solutions
- Improve active promotion of a sustainable lifestyle through incentives and price-advantages (ex. use of public transport, economic organic food, parking for hybrid & electric cars only)

D4: Social design of products / services (25/30)

Social grading of pricing, special services for disadvantaged clients

Excellent
Good
Sufficient
Insufficient
Critical

Overall and highlights

- Scholarships are offered to selected groups of students

Conflict / Unclear Answers

- No conflicts/unclear answers

Suggestions

- Actively offer scholarships, or work with institutions for low-cost educational loans
- Offer access to people with physical disabilities

Excellent
Good
Sufficient
Insufficient
Critical

D5: Raising Social & Ecological Standards (25/30)

Implementing standards for social security, sustainability, transparency and collaboration.

Overall and highlights

- BSL is considered as being a role model for raising social and ecological standards in the academic world
- BSL cooperates with academic institutions worldwide with the purpose of promoting & raising social and ecological standards
- Collaboration with NGOs

Conflict / Unclear Answers

- No conflicts/unclear answers

Suggestions

- Formalize behaviour in this field (share vision, mission & culture)
- Provide clarity among stakeholders on what BSL corporate culture is and stands for
- Introduce a BSL guidelines and "blueprint for the future" document to better define BSL vision & mission

E1: Social impact on product & services (50/90)

Social impact on product & services that respect sustainable lifestyles

Overall and highlights

- Survey shows unclarity of impact and approach of BSL services on enhancing a sustainable lifestyle within different stakeholder groups
- BSL is not yet clearly and fully positioned as the school for "sustainability in business"

Conflict / Unclear Answers

- Do you actively foster sustainable lifestyles among staff, students, faculty, etc.? (disparity in answers among students, staff and faculty, yes and no)
- Is your curriculum adapted to the diverse cultural sensitivities of the students? (students/alumnis: 70%yes, 30%no)

Suggestions

- Enhance and communicate the importance of sustainability in BSL culture and DNA
- Actively foster a sustainable lifestyle for students, faculty, staff, alumni.

Excellent
Good
Sufficient
Insufficient
Critical

E2: Contribution to Local Community (20/40)

Contribution to Local Community by offering jobs, creating a healthy working environment, providing financial, educational and active support to the community

Overall and highlights

- Room for improvement: offering no financial support nor volunteering activities.
- No measurement of their contribution to the community
- Not much alignment & clarity among and between stakeholders
- Results too low for an institution that wants to be leading edge and progressive

Conflict / Unclear Answers

- Do you offer free "usage" of your resources to the local community (space, personnel, students, etc.)? (Mgmt/Pres: yes, students: 50% no)
- Do you have cooperations with NGOs? (Mgmt: yes, Pres: no)
- Are you perceived as a 'socially active/positive' institution? (Mgmt/Pres: yes, students: 67% yes - 33%no)
- Disparity in answers reflects insufficient internal communication

Suggestions

- Enhance and communicate the importance of community engagement in BSL culture and DNA
- Work with NGOs on educational projects and topics and communicate these efforts
- Engage and support local community besides efforts around 50+20 initiative (global community impact)

Excellent
Good
Sufficient
Insufficient
Critical

E3: Reduction on impact on environment (5/70)

Reduction of business-specific environmental impact on a sustainable level: resources, energy and climate, emissions, waste, etc.

Overall and highlights

- Lots of room for improvement: no system to monitor, measure nor improve footprint
- No ISO 14.001 compliance nor any other certification
- Insufficient information available about ecologic data, no transparency and no communication

Conflict / Unclear Answers

- ./.

Suggestions

- Implement a system to monitor and improve the footprint (URGENT)
- Define the priorities in this field (energy efficiency, mobility of staff, faculty and students, etc.)
- Work towards a certification (ISO 14001)
- Reinforce existence of responsibility report
- Consider moving the school to a more eco-friendly building

Excellent
Good
Sufficient
Insufficient
Critical

E4: Minimizing external profit distribution (50/60)

No interest-rates or at most inflationary adjustment of the capital of external owners.

Overall and highlights

- Private/family ownership is a clear positive
- Ideal shareholding structure to implement quick and massive changes towards sustainability, if shareholders want this positive change.

Conflict / Unclear Answers

- ./.

Suggestions

- Include in teaching subjects on social injustice and unequal capital distribution

E5: Social transparency & co-determination (20/30)

Considering to provide transparency to stakeholders and community and to enable co-determination of those.

Overall and highlights

- Information is transparently provided to all who show interest, apart from financial information
- Co-determination of stakeholders is supported and proactively engaged.

Conflict / Unclear Answers

- ./.

Suggestions

- Include in teaching subjects on this field
- Publish and broader provide the sustainability report (PRME report; place prominently on internet plus print leaflets) and renew report yearly to monitor progress and implement real change
- Apply GRI A+ standards to the report
- Implement Common Goods Economy report and monitor report progress annually

Human Dignity (0/-550)

Violation of Norms, negative products/services (weapons, tobacco, porn, nuclear power, etc.)

Excellent

Good

Sufficient

Insufficient

Critical

Overall and highlights

- NO problems/issues in this area

Conflict / Unclear Answers

- ./.

Suggestions

- Proactively introduce in management classes teaching/discussion related to the negative impact of such practices

Solidarity (0/-500)

Hostile takeovers, blocking off patents, dumping prices

Excellent

Good

Sufficient

Insufficient

Critical

Overall and highlights

- NO problems/issues in this area

Conflict / Unclear Answers

- ./.

Suggestions

- Proactively introduce in management classes teaching/discussion related to the negative impact of such practices

Ecological Sustainability (0/-450)

Environmental pollution, violation of int'l standards, planned obsolescence

Excellent

Good

Sufficient

Insufficient

Critical

Overall and highlights

- NO problems/issues in this area

Conflict / Unclear Answers

- ./.

Suggestions

- Proactively introduce in management classes teaching/discussion related to the negative impact of such practices

Social Justice (0/-750)

Gender disparity in compensation, off shoring, tax havens, etc.

Excellent

Good

Sufficient

Insufficient

Critical

Overall and highlights

- NO problems/issues in this area

Conflict / Unclear Answers

- ./.

Suggestions

- Proactively introduce in management classes teaching/discussion related to the negative impact of such practices

Democratic co-determination & transparency (-100/-250)

Prohibition of work council, non disclosure of shareholdings & subsidiaries

Excellent

Good

Sufficient

Insufficient

Critical

Overall and highlights

- Non-disclosure of shareholdings and subsidiaries

Conflict / Unclear Answers

- ./.

Suggestions

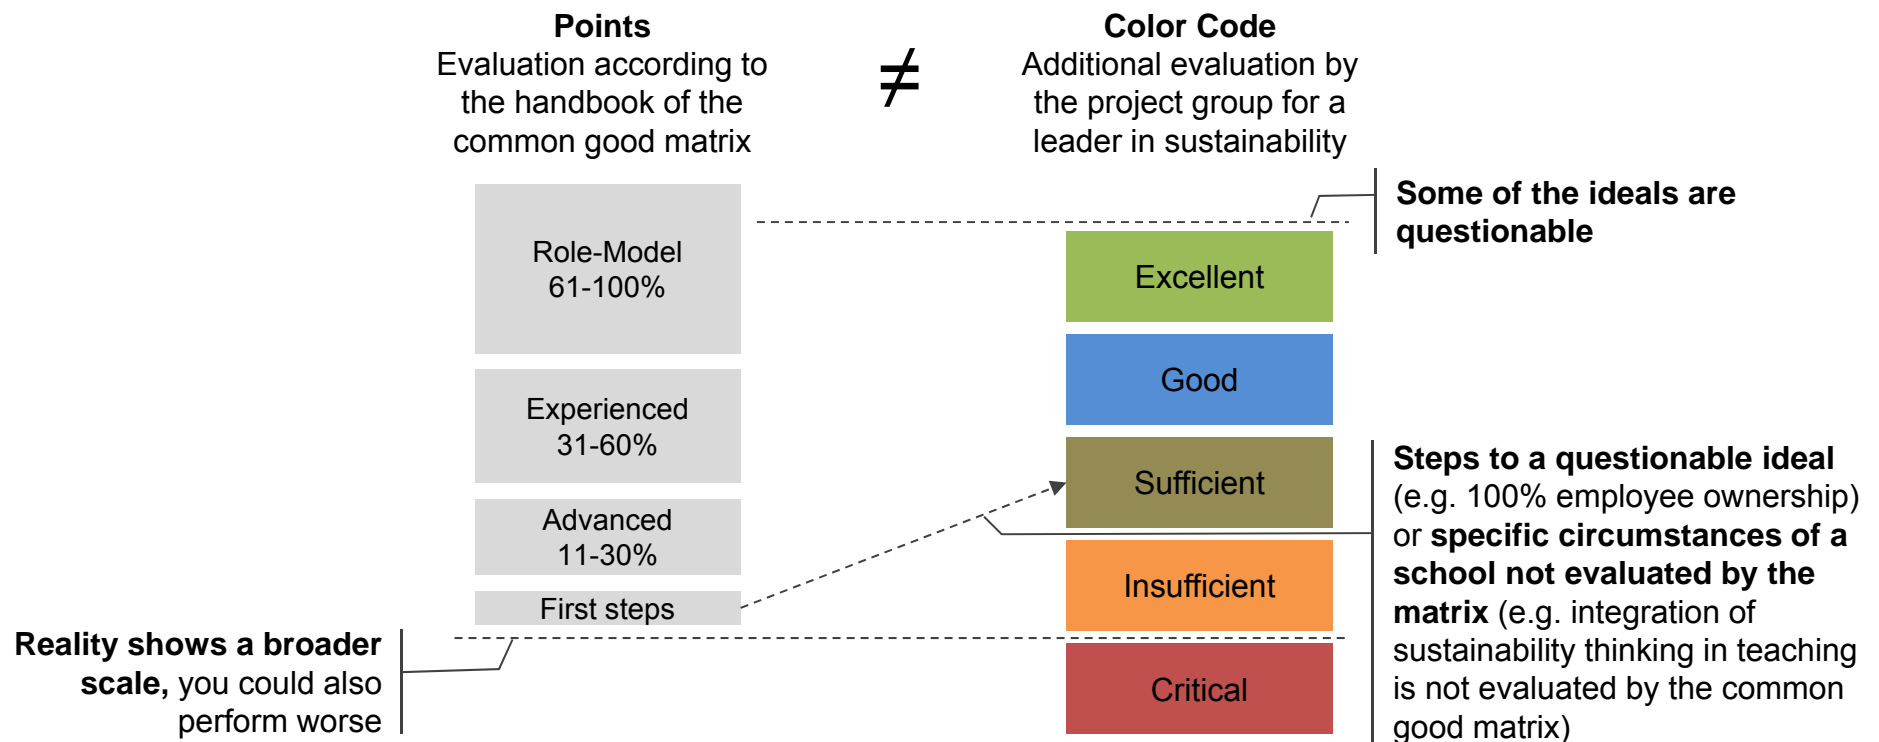

- Provide transparency of shareholdings
- Proactively introduce in management classes teaching/discussion related to the negative impact of such practices

Interpretation of the results

- The Matrix and the Assessment delivers **interesting insights** on where BSL can improve.
- The benefit of the Common Good Matrix lies in its **consequent and independent approach** with clear propositions on how to contribute to the common good in the dimensions of human dignity, solidarity, ecological sustainability, social justice and democratic co-determination and transparency.
- The beliefs behind the matrix are valid in its foundations, but the movement presents **strong and controversial implications** as results.
- To reach the maximum score of 1000 points one needs to fulfil partly **extreme criteria** (e.g. 100% employee ownership or max. 38 working hours per week)
- BSL lies in the range from 200 to 400 points and would have to pay **30% VAT** according to the concept of a Common Good Economy.
- Recent years show, that the **best institutions** scored a bit more than **600 points in the first year**. However one must be aware of the fact that most of those high scoring companies were **small local organizations** (e.g. organic farmer, social network, etc.)

Who do we compare ourselves with?

To not only compare against a sometimes questionable and rather extreme ideal, we created a rating and colour coding system to estimate the results from a more moderate point of view. Still taking into account BSLs vision to be an outstanding leader in the field of sustainability and responsibility.

IMPLEMENTATION OF PROJECTS

9 GREEN TEAMS
OF «LOW HANGING FRUIT»
AROUND ECG BLIND SPOTS

Projects “the low hanging fruits”

	Project	Lead	Team
A	Writing a new BSL vision and mission statement that truly reflects our ambition.	Katrin	Leadership Team
B	Developing a concrete and highly visual communication plan where we share our progress in all critical areas compared to our vision (with a big regularly updated board at the entrance as well as in other medias)	Denitsa Edgar Mark	Lei Juan Mischa Almendra Jon Katrin
C	Developing a concrete strategy for offering sustainability, responsibility and entrepreneurship courses to our region (commune, businesses, NGOs, civil society etc.)	Natalie Mark	Veronique Alkis Denitsa Olivier Mary Kartin
D	Measuring the footprint of BSL (company students, faculty, staff, key suppliers and stakeholders) and communication of the results	Veronique Massimo	Alkis
E	Saving energy at BSL (e.g. install motion-sensor light switches, low energy lighting, thermostat to heat/cool to a max/min temperature, etc. (e.g. with Cleaner Product Assessment)	Nick Alkis	Arjun
F	Improve recycling at BSL (add. recycling bins, new solutions for water cups, etc.)	Donna Domenica Arjun	
G	Developing and introducing an easy-to-manage way to subsidize public transportation by charging parking lot spaces	Monica Nick	
H	Developing a feasible solution for our staff to partially work at home (where possible and highlighting how we can thus improve our service level)	Olivier Monica	
I	Evaluating options to provide healthy and organic nutrition at BSL (understand need and come up with a feasible solution)	Veronique Natalie Donna	

Evaluation of the effect on the Common Good Matrix

Owners	C1: Job quality and Equality Guaranteeing humane work conditions, advancing physical health and mental well-being, self-organized and meaningful working environment, Life Balance, equal opportunities / inclusion of disadvantaged persons	30/90	C2: Just distribution of labor Reduction of overtime working hours, waiving all inclusive contracts, reduction of standardized working hours, contribution to the reduction of unemployment	30/50	C3: Advancing and demanding eco-friendly behavior and a sustainable lifestyle of staff members (mobility, food, training and awareness raising activities, sustainable organizational culture)	C4: Just distribution of incomes, low wage dispersion (netto) within a company, compliance with minimum and maximum incomes 60 C5: Transparency and co-determination Transparency of decisions and figures, co-determination of staff members on operative strategic decisions, election of executive managers, transferring ownership to staff members (e.g. sociocracy)	
D) Customers / Products / Services / Business Partners	D1: Ethic sales Customer focus and co-determination, cooperation with consumer associations, trainings in ethic sales, ethical marketing, ethically adjusted bonus schemes	20/50	D2: Solidarity with business partners Dissemination of information, know-how, personnel, orders, interest free loans, participation in cooperative marketing and crisis management	35/70	D3: Ecological design of products and services Offering of ecologically superior products/services, awareness raising programmes, consideration of ecological aspects when choosing customer target groups	D4: Social design of products/services Social grading of prices, no barriers, special products for disadvantaged customers D5: Raising social and ecological standards within the specific sector, role model effect, development of higher standards together with business partners, lobbying	
E) Social Environment: Region, sovereign, future generation, global fellow human beings, animals and plants	E1: Social effect and impact of products / services Meaningful products under consideration of sustainable lifestyles	50/90	E2: Contribution to the local community Mutual support and cooperation through financial resources, services, products, logistics, time, know-how, knowledge, contacts, influence	20/40	E3: Reduction of impact on the environment Reduction of business specific environmental impact on a sustainable level: resources, energy & climate emissions, waste etc.	E4: Minimizing distribution of profits to external persons No interest rates or at most inflationary adjustment of the capital of external owners E5: Social transparency and co-determination, reporting in accordance with Global Reporting Initiative (GRI), Common Welfare Report, co-determination of stakeholders	
Negative Criteria	Violation of ILO norms and standards / human rights -200 Products not respecting human dignity, e.g. weapons, nuclear power, genetically modified food -200 Acquisition at / Cooperation with companies that violate human dignity 0/-550	-200 -200 0/-550	Unethical business practices Blocking off patents -100 Dumping prices -200	-100 -200	Massive environmental pollution -200 Gross violation of environmental standards (e.g. limiting values) -150 Planned obsolescence (short lifespan) -100 Interest rates on equities > 10 % 0/-450	Unequal remuneration for women and men -200 Job cuts or off-shoring for profits -150 Subsidies in tax heavens -200 0/-750	Non-disclosure of shareholdings and subsidiaries -100 Prohibition of a works council -150 -100/-250

Field affected by improvement:

E2: Contribution to Local Community (20/40)

Implementation Challenges

Motivation

- Motivate green team to participate and engage
- On the long-term
- For a voluntary work

Presence & Communication

- Connect and stay in contact with green team leaders over distance and offer support.
- Our role was not very clear – support or control?

Time

- Ambitious dead-lines
- Besides enough work and other projects
- Creating potential of frustration – as results might lack quality

Recommendations and handing over

The ground has been layed. Now the challenge is to keep the movement going. Further, the movement should become highly visible and bold – intensive internal and external communication to reach top of mind.

1. Keep the motivation level up
2. Control vs. Support – find the right balance
3. Sustainability management system – track BSL's success and make it visible
4. Marketing & Communication strategy – make the new vision and BSL's aspiration to become the leader in sustainability education being heard

New BSL project:

Create a Culture and an Environment @ BSL that support and foster the implementation of the new Mission and Vision statement.

More on: www.bsl-lausanne.ch

“Many seeds have already been planted at BSL. Some of them are starting to emerge and may even start to bear fruits.

As the story of our vision will continue to emerge, so will additional elements contribute to our story thus continuously reshaping our vision.

This is just a start of many stories that exist in our BSL community and that are just waiting to be told.“

BSL vision paper
