

Sustainability Concentration

This concentration is geared towards budding leaders and social entrepreneurs. You will master the sought-after competencies to initiate the transformation required for sustainable business. Learn from industry leaders in sustainability transformation and culminating your degree with our signature customizable capstone experience!

In today's ever-changing environment, leaders need to be able to analyze and quickly adapt to these changes by initiating and implementing sustainability-focused business processes within local or global organizations. BSL's MIB program will help prepare you and your already strong desire to master these capabilities,

enabling you to earn the keys to unlock future, unknown challenges that lie ahead for social enterprises.

Benefits

Choose a powerful social entrepreneurship experience to apply all your learnings, either to start your own social enterprise or to complete an internship or perform a comprehensive case study within a social enterprise.

6 specially crafted sustainability-driven courses offer you significant insight on the depth of integration of sustainability in business models, strategy and HR.
